

CREATE IBM WATSON IOT PLATFORM AND DEVICE

AIM:

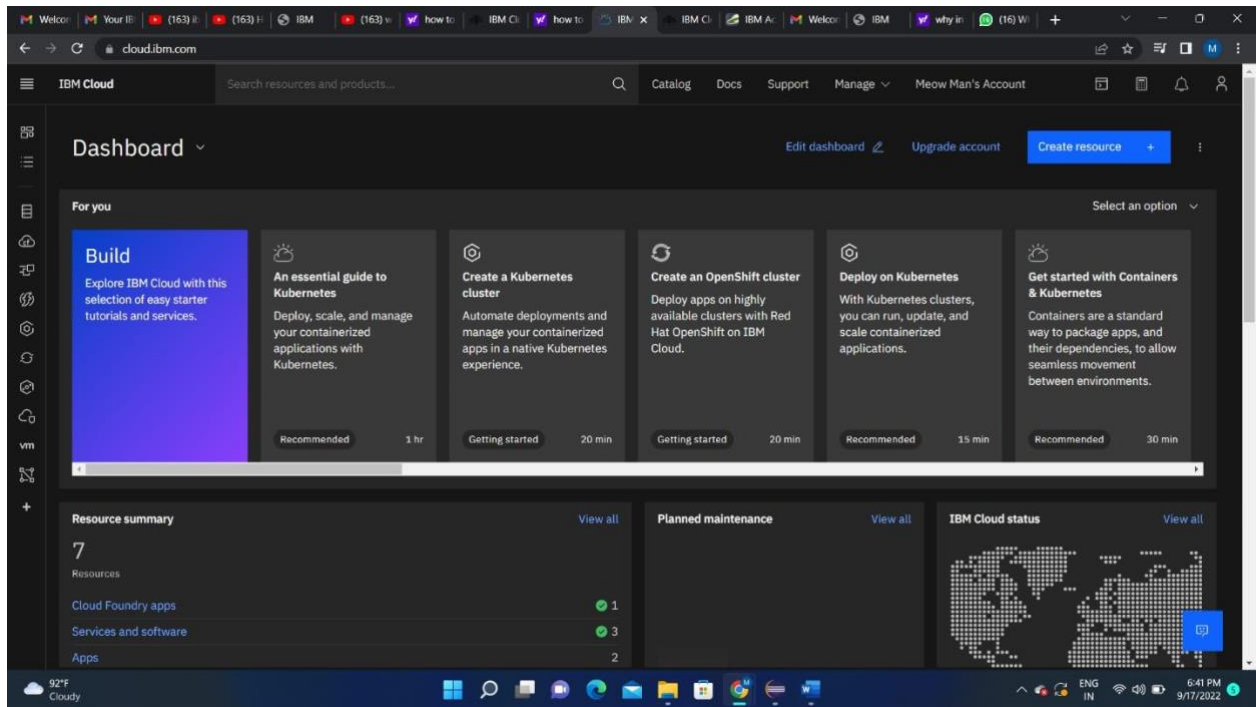

To create the IBM Watson IoT platform and device

STEPS:

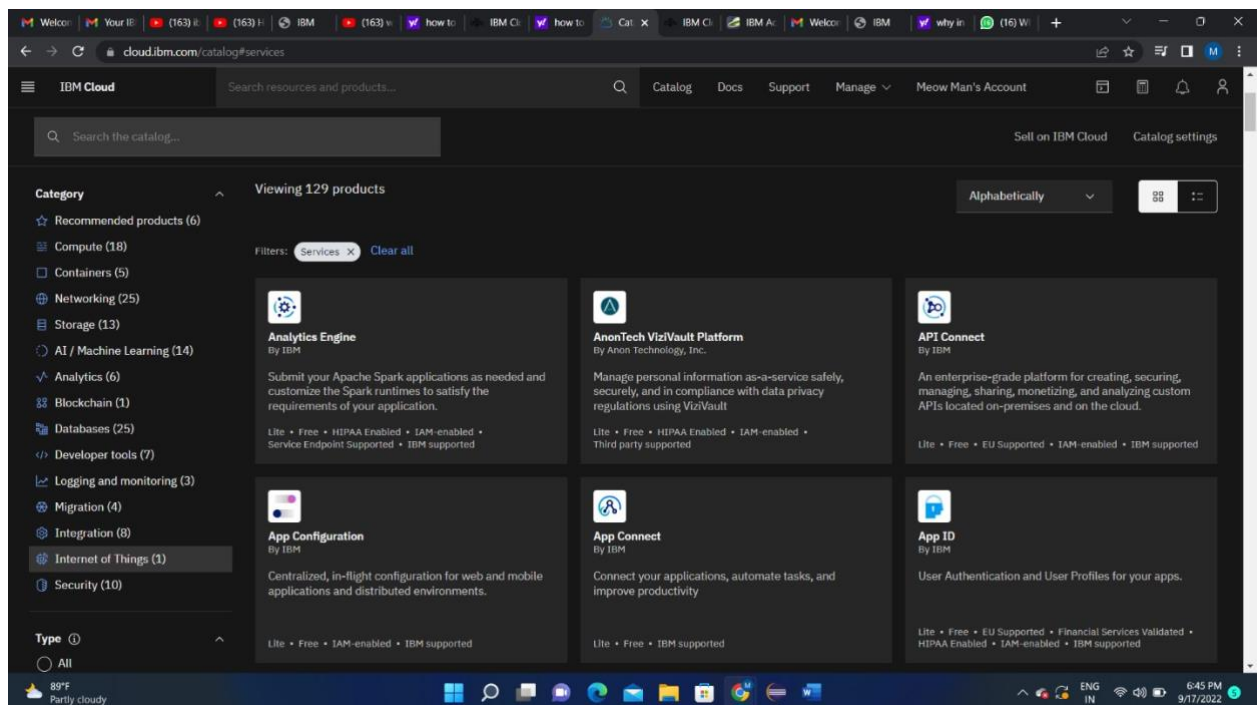

1. Firstly create an IBM cloud account with IBMid and password

2. Home page of IBM cloud

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

IBM Cloud

Search resources and products...

Internet of Things Platform

This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data.

7.

Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

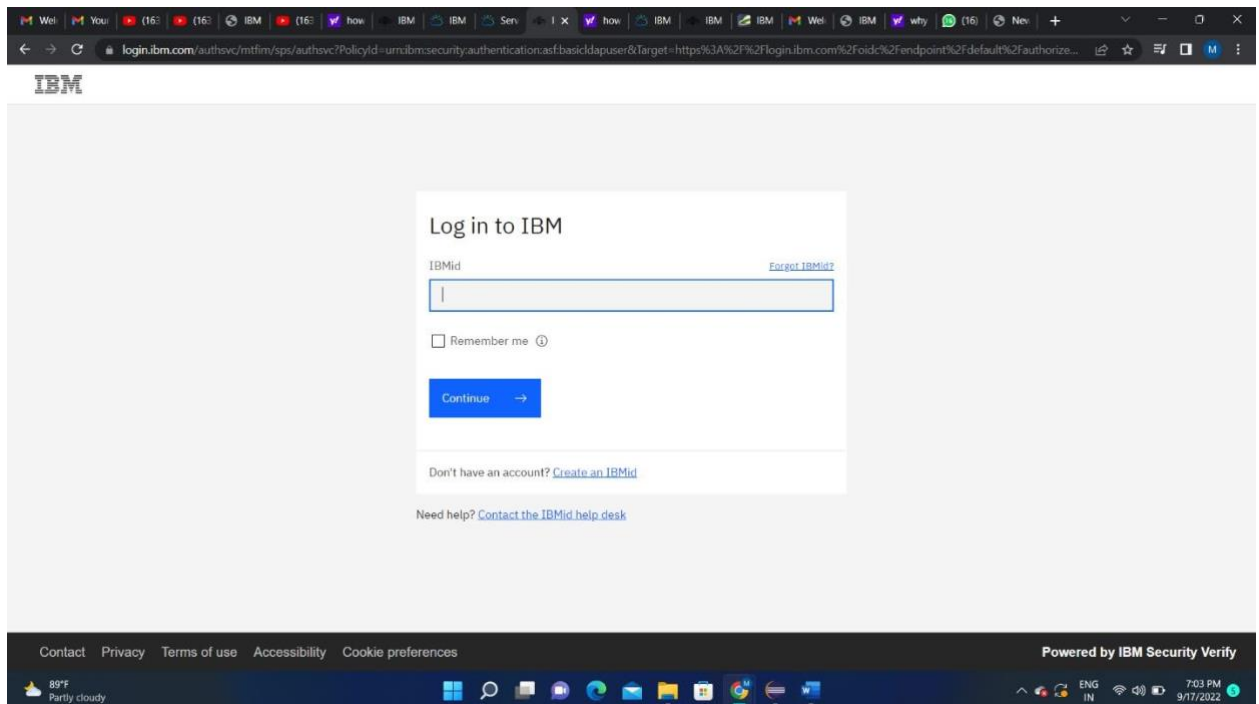

8.

Clicking on the launch button in the manage tab, it will open to this

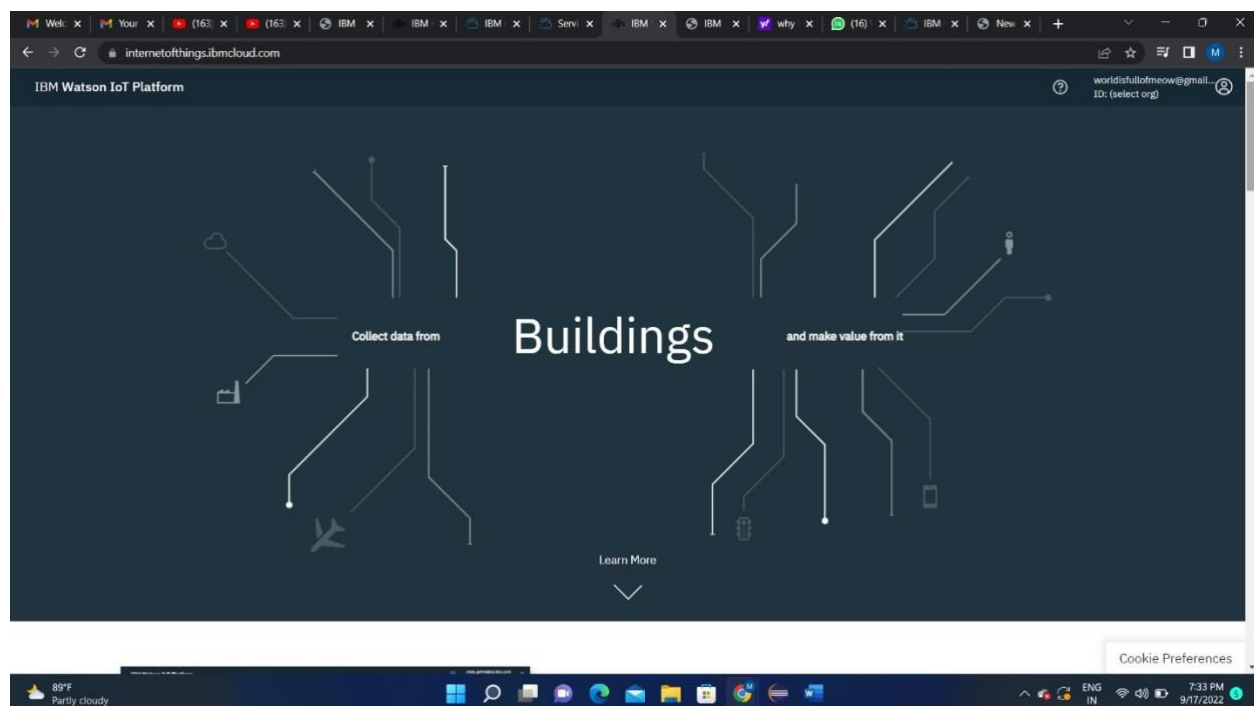

9. Enter the details to sign in to the Watson Cloud to create a device

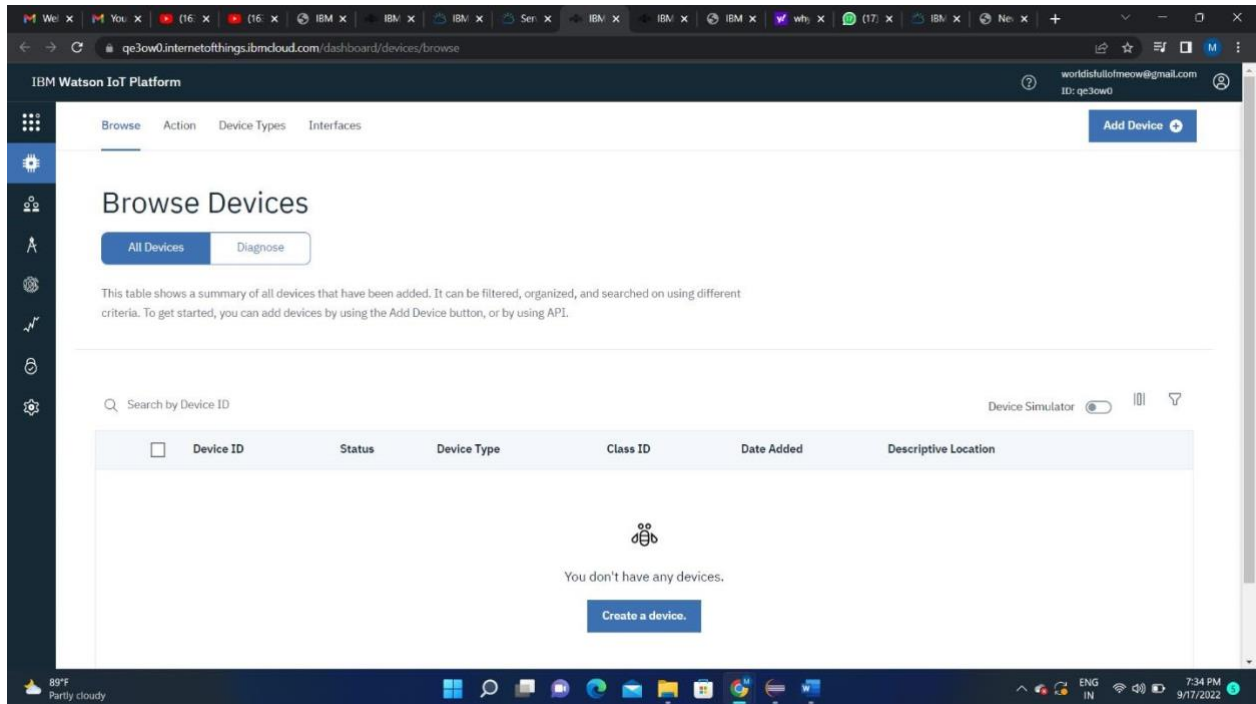

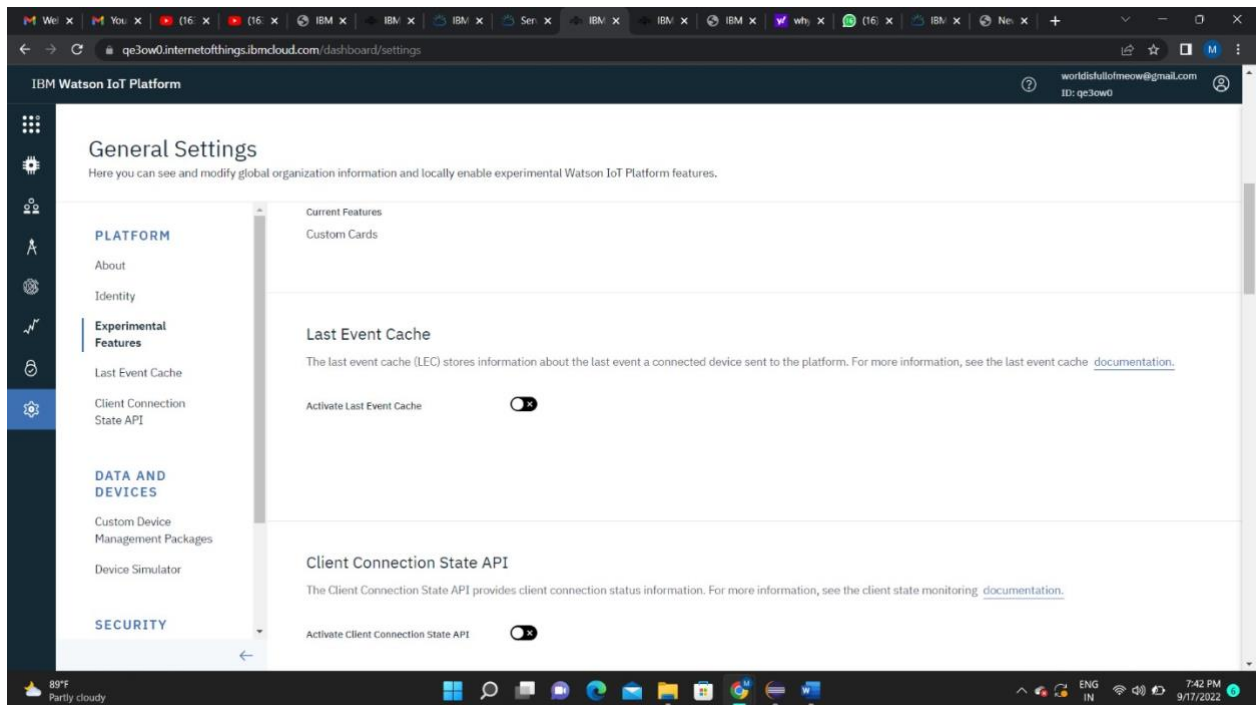

10. Once logged in the name will be displayed and it goes back to the first page

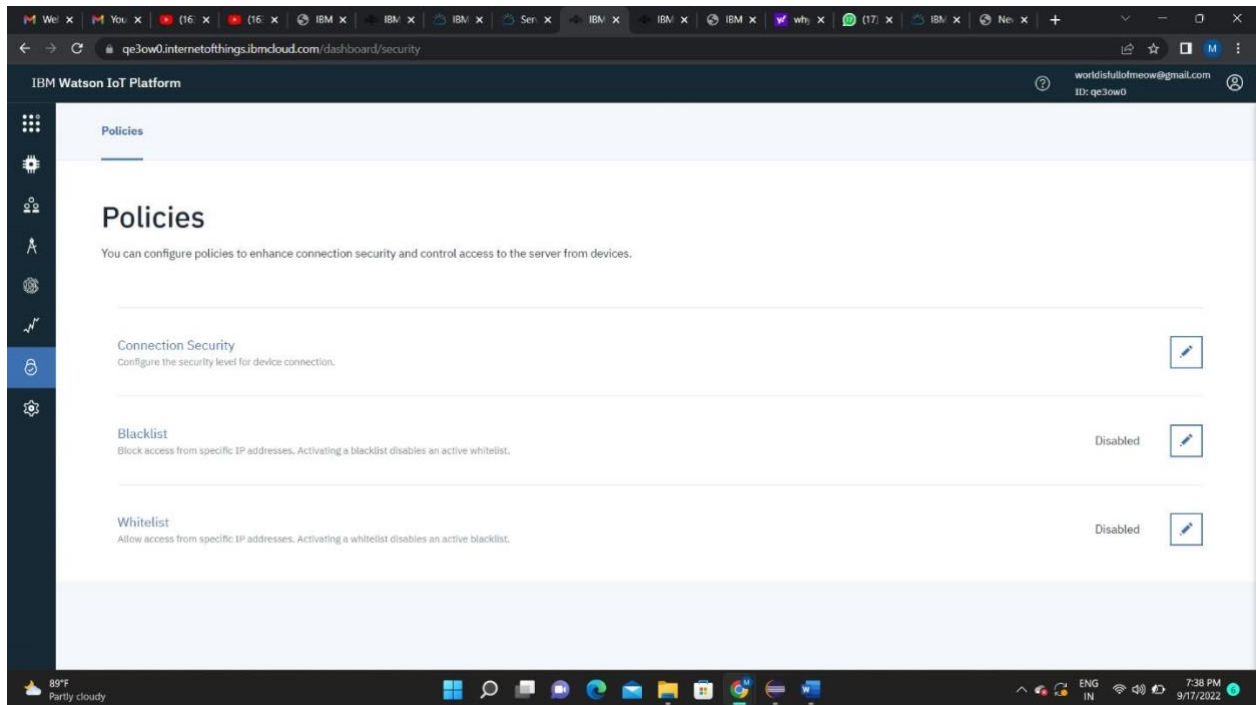

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

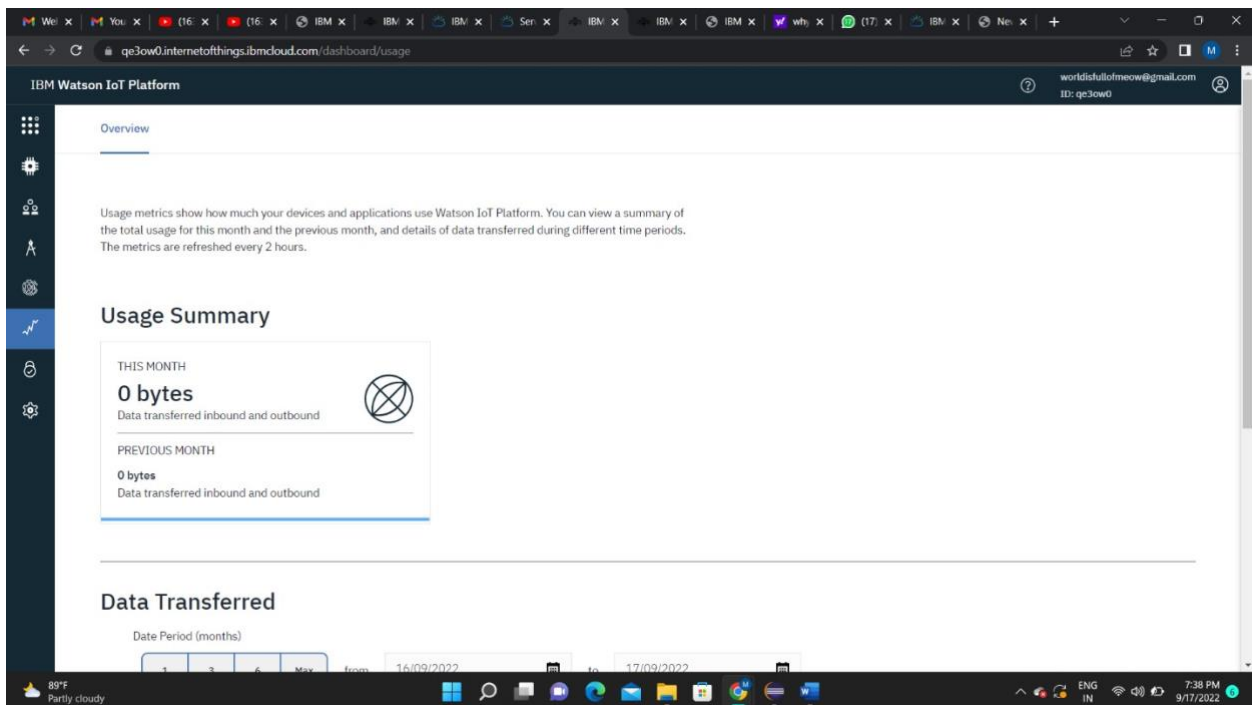

12. The setting tab is used to change the general setting if needed for the project.

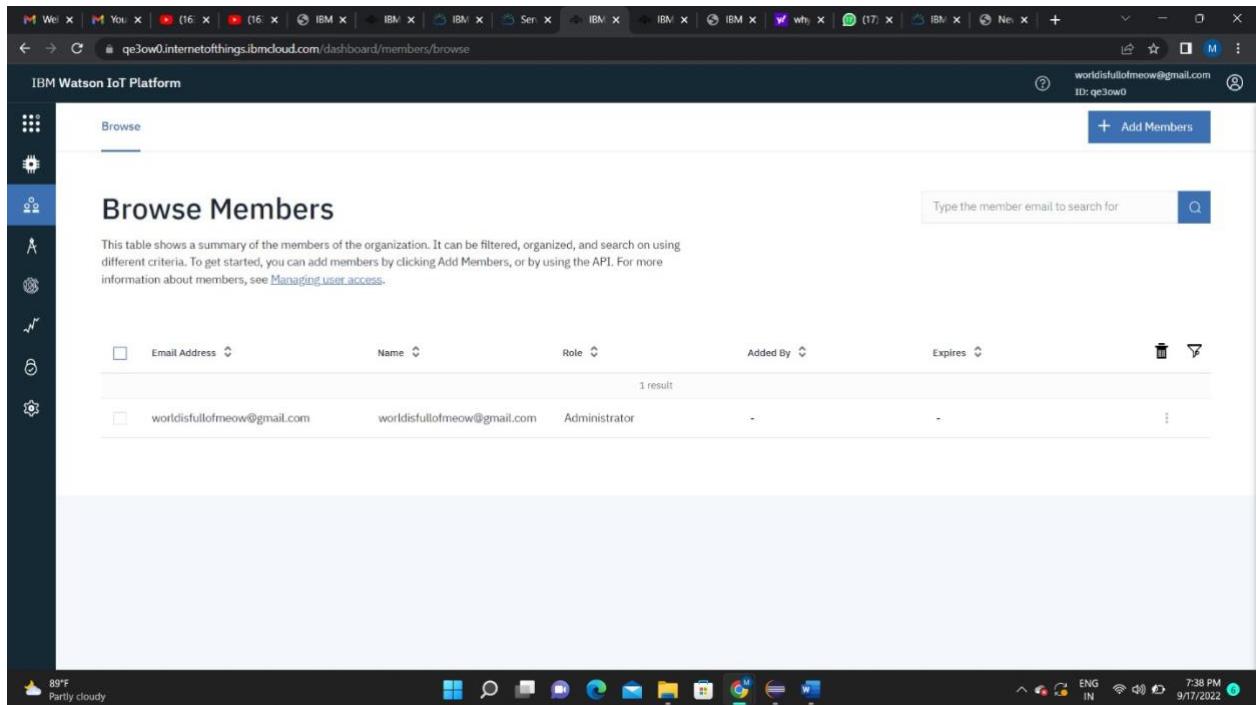

13. In the security tab we can choose the type of security connection and can change according to specification

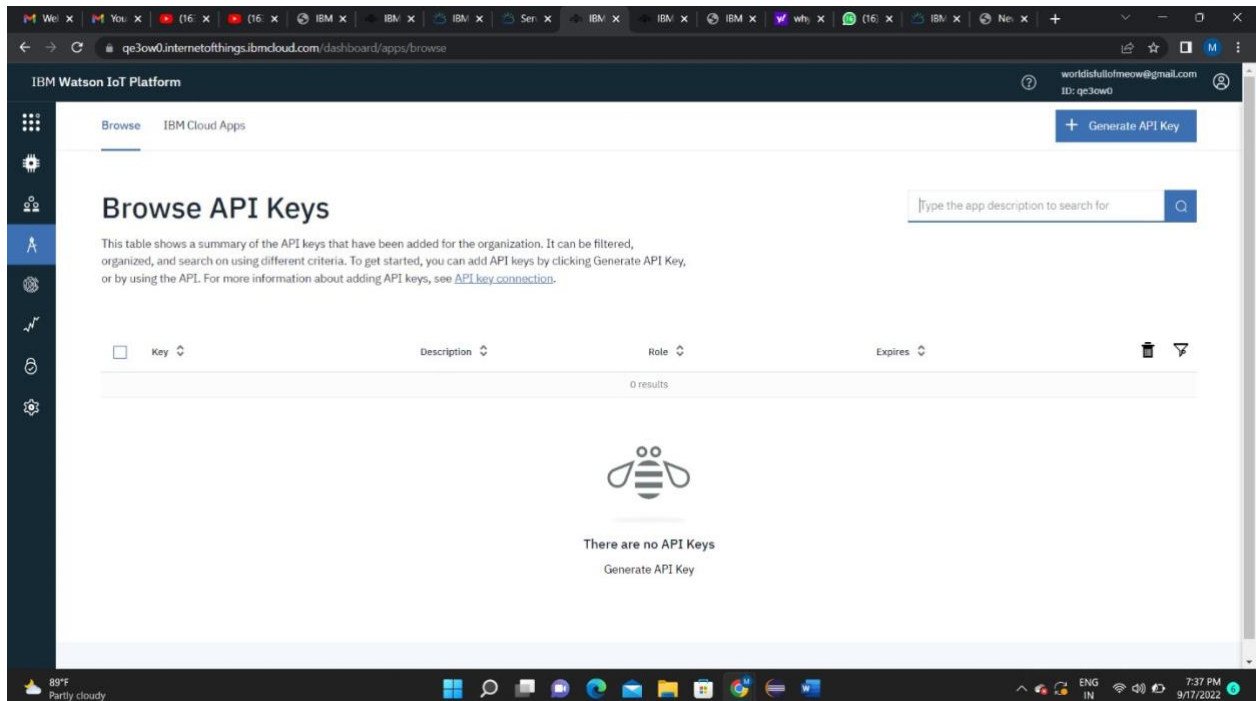

14. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

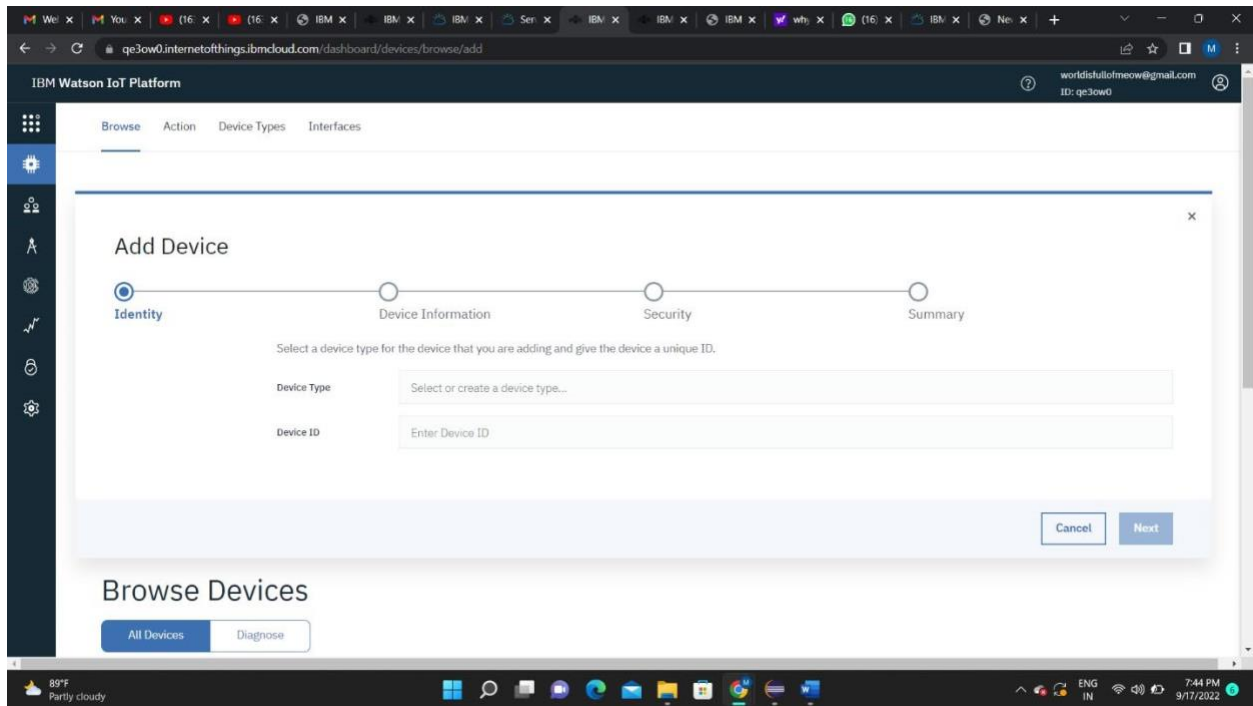

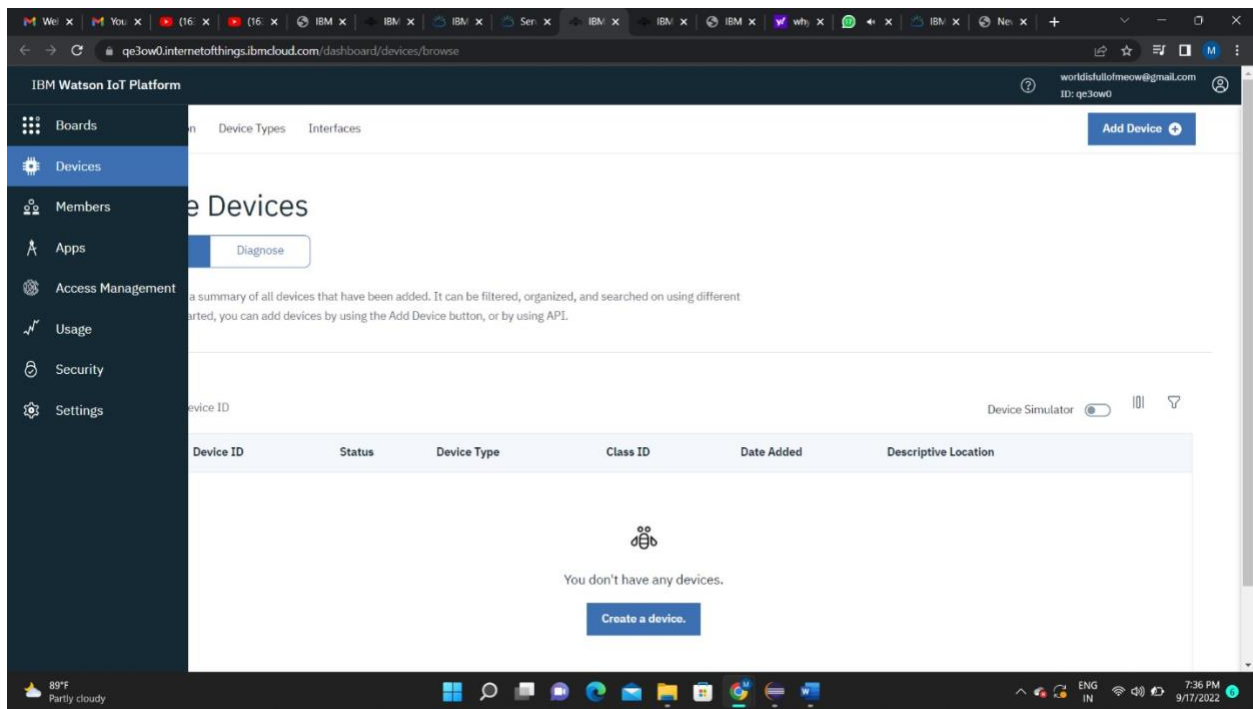

15. The member tab is add the teams members to work in the platform

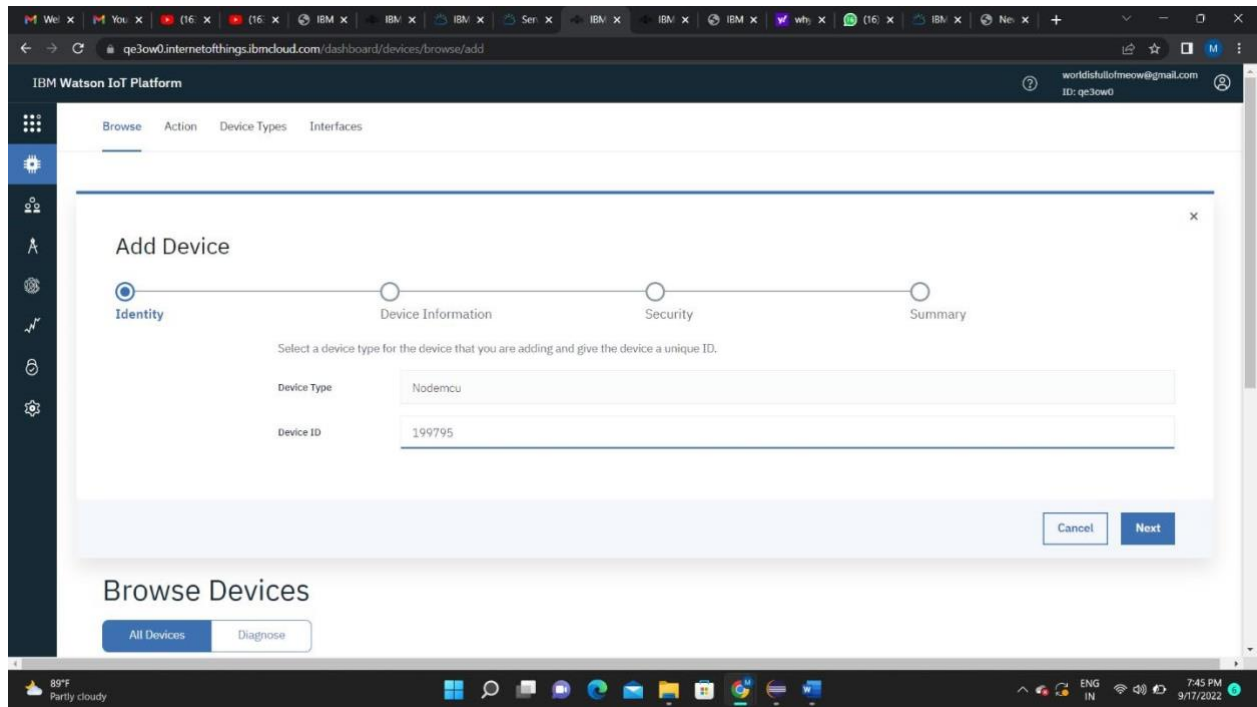

16. This tab is used when you want to connect to some other platform and to integrate with other services.

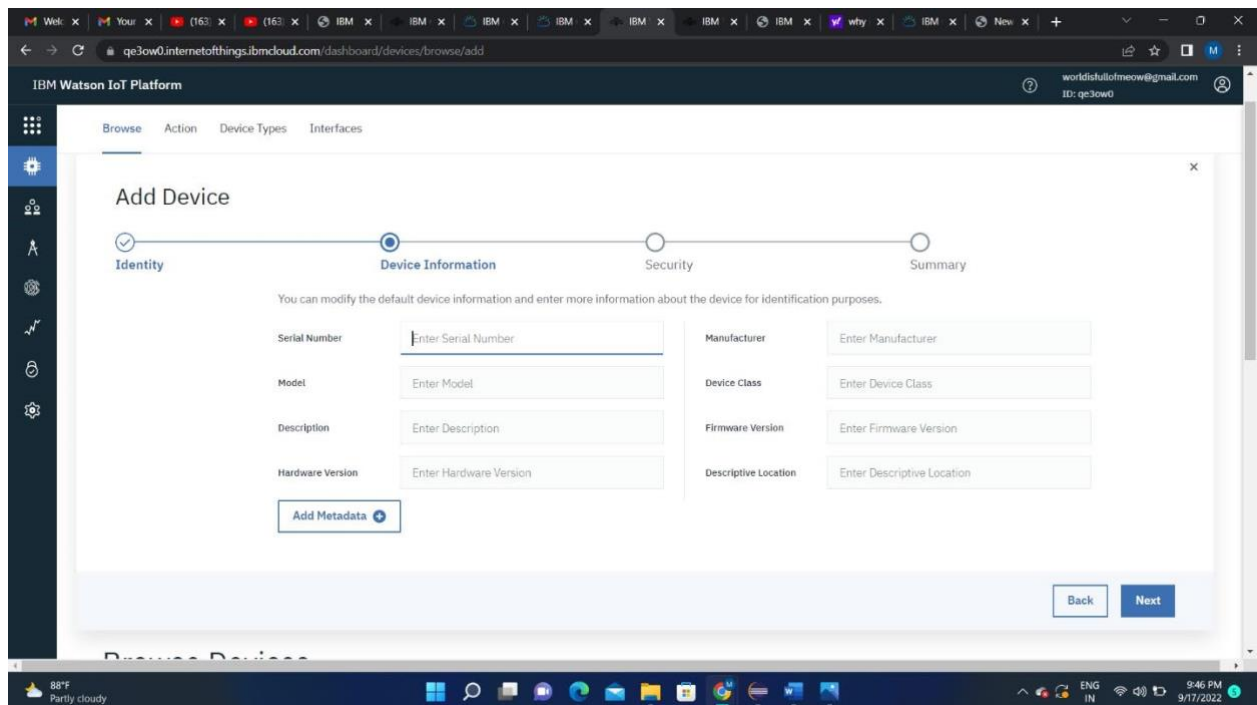

17. Click on the device tab and click on the add device button, then give the device type and device id and click next

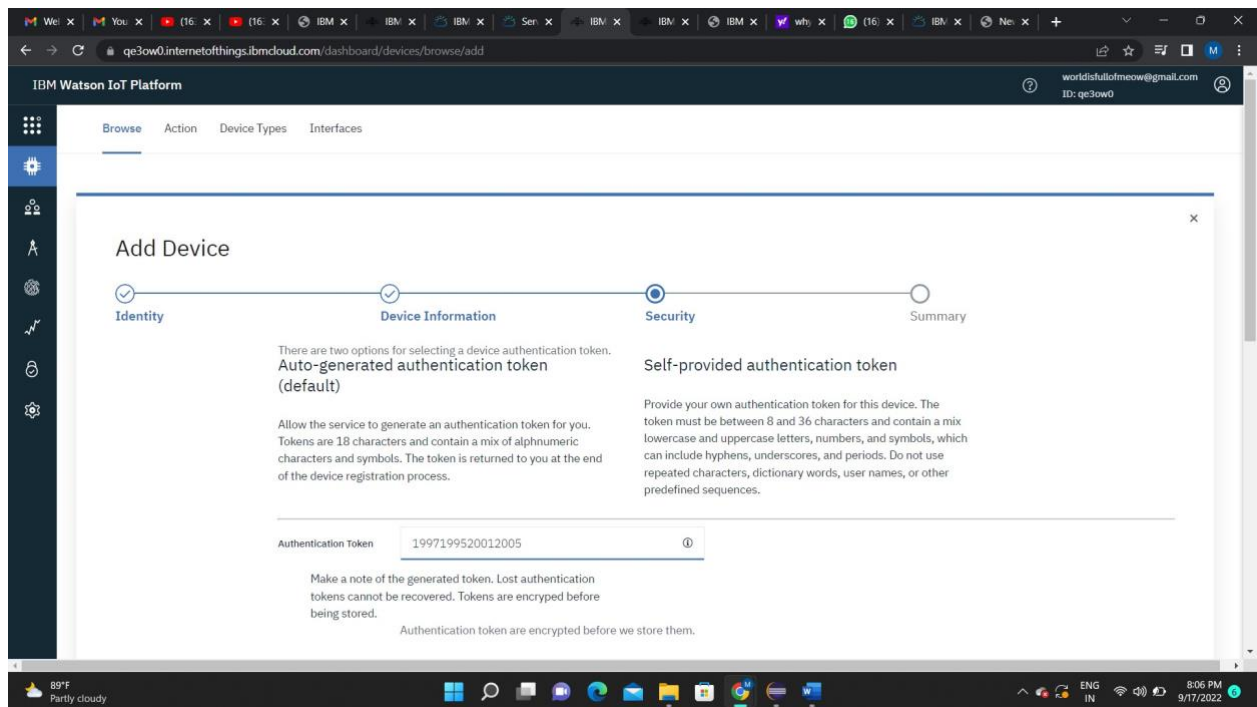

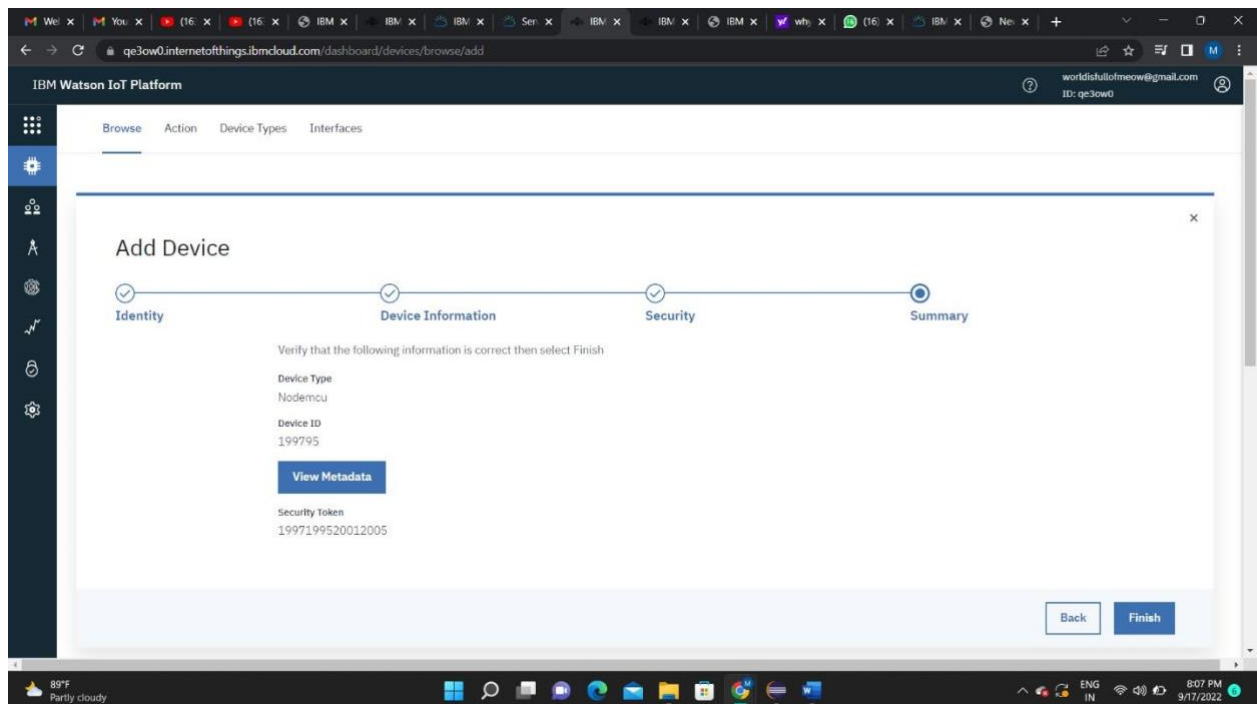

18. This page to enter extra details and of the hardware

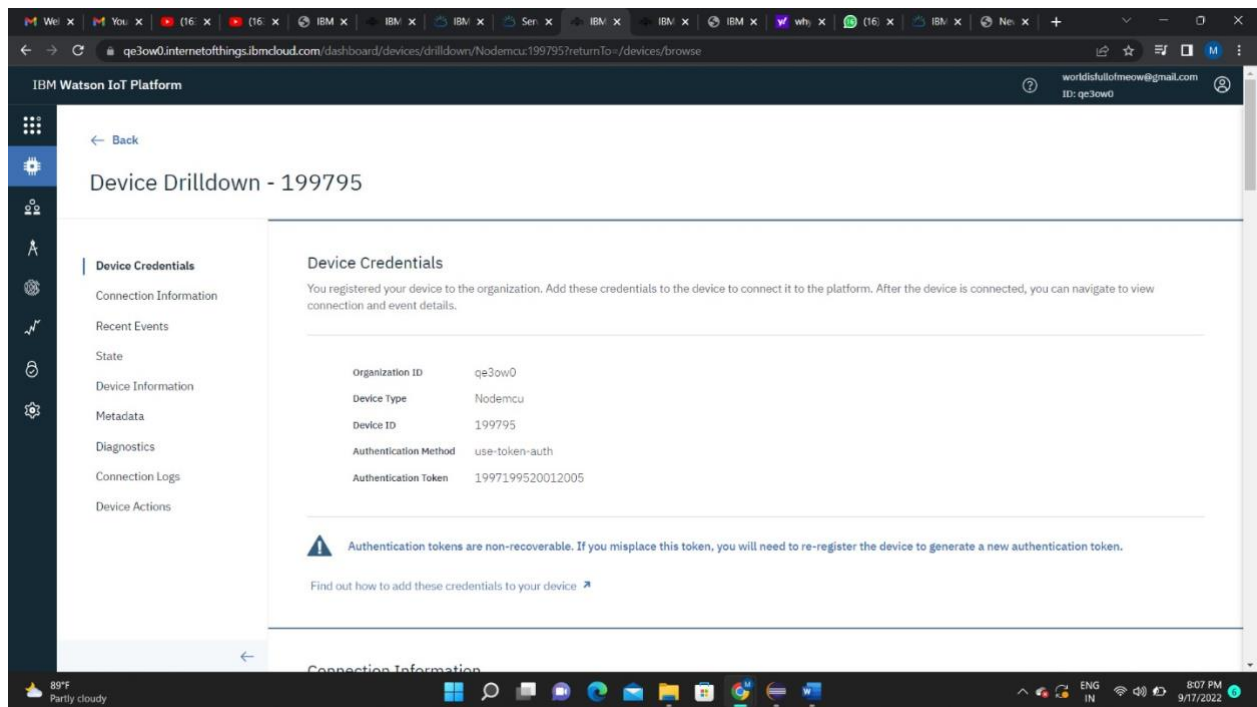

19. Clicking next it goes to the security where we do authentication token id.

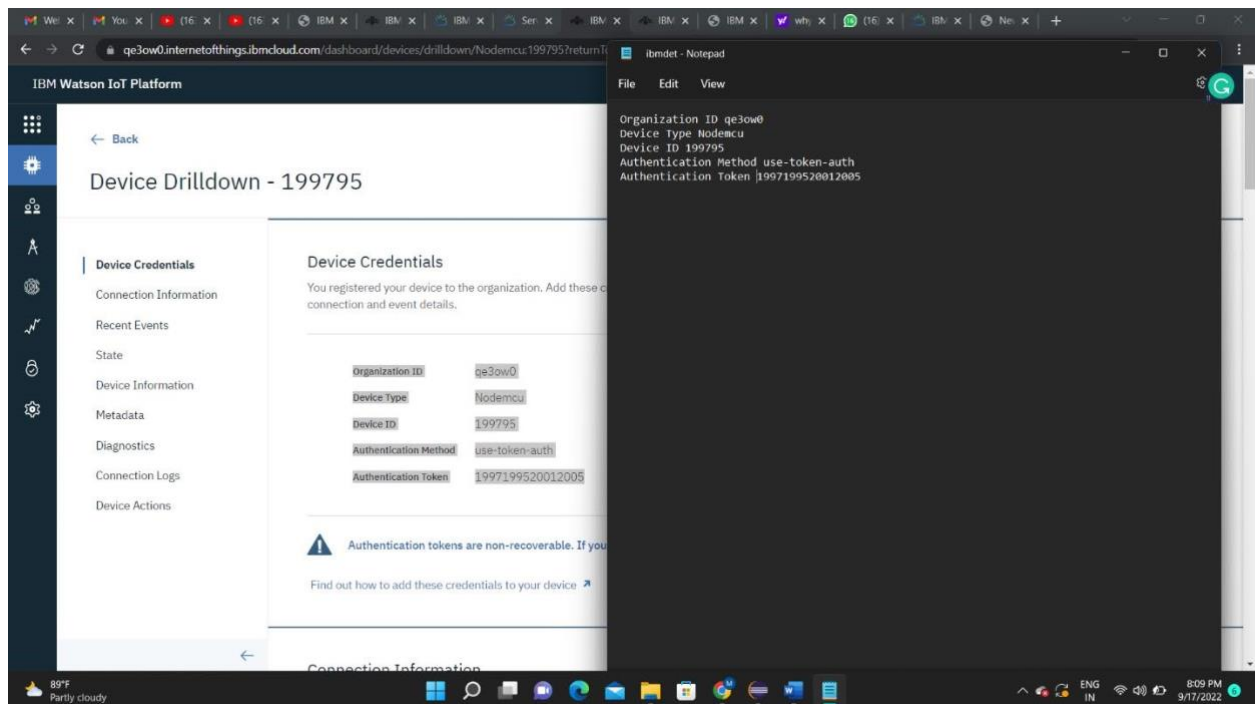

20. Clicking on next it goes to the summary of the device then click finish

21. The device credentials will be displayed with all the details

22. Save the details of the device as the authentication tokens are nonrecoverable and if misplaced then we have to create a new one.

23. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is present with the text 'Search by Device ID'. Below the navigation bar, there is a table with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. The table contains one entry with Device ID 199795, Status Disconnected, Device Type Nodemcu, Class ID Device, and Date Added 17 Sep 2022 20:07. Below the table, there is a tabbed interface with tabs: Identity, Device Information, Recent Events, State, and Logs. The 'Recent Events' tab is selected, showing a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: Event, Value, Format, and Last Received. The table is currently empty, and a message 'Waiting for device events...' is displayed at the bottom.

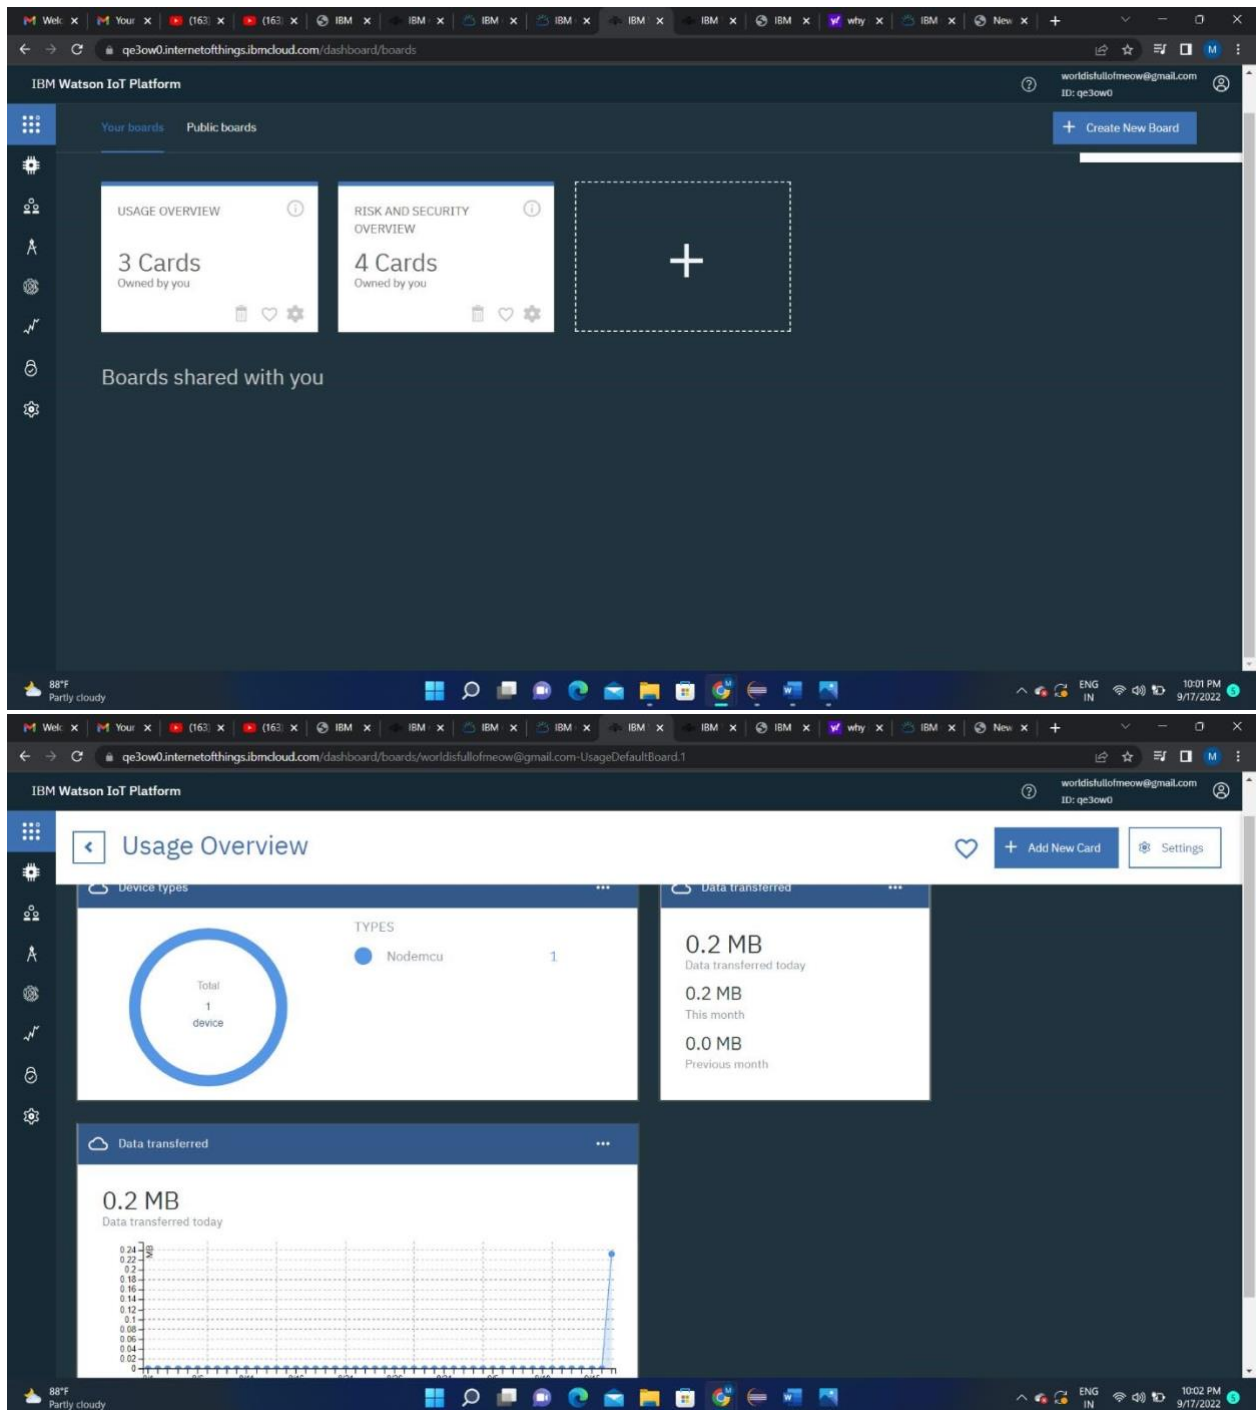

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is present with the text 'Search by Device ID'. Below the navigation bar, there is a table with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. The table contains one entry with Device ID 199795, Status Disconnected, Device Type Nodemcu, Class ID Device, and Date Added 17 Sep 2022 20:07. Below the table, there is a tabbed interface with tabs: Identity, Device Information, Recent Events, State, and Logs. The 'Device Information' tab is selected, showing a table with the following data:

Property	Value
Device ID	199795
Device Type	Nodemcu
Date Added	17 Sep 2022 20:07
Added By	worldisfulofmeow@gmail.com
Connection Status	Disconnected

At the bottom of the page, there is a footer with the text 'Items per page 50 | 1-1 of 1 item' and '1 of 1 page'.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

24. The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
